

**First-Time Hawaii and Mainland Freshmen  
at the University of Hawai'i at Mānoa, Fall 2007  
Office of the Vice Chancellor for Students  
July 2008**

This report presents the findings of a web survey administered to first-time, full-time, and classified freshmen from Hawaii and from the continental US who entered the University of Hawai'i at Mānoa during the fall 2007 semester. It is hoped that the results will provide a better understanding of the characteristics, plans, and attitudes of entering Hawaii and mainland students and will lead to enhancing their educational experiences at UH-Mānoa.

Of 1,761 entering freshmen, 428 responded to the Cooperative Institutional Research Program (CIRP) survey. Of the 428, 303 or 71 percent were respondents from Hawaii and 102 or 24 percent were from the mainland. Respondents were proportionate to the overall population of incoming Hawaii and mainland students.

This report covers the characteristics of respondents, their high school background, their engagement in activities, and the time spent in a range of activities. On the college level it assesses their college choice, financial situation, parental involvement, college objectives, career and college plans, self-assessment of their abilities, anticipated involvement in activities, and attitudes on societal issues.

Part I highlights the survey results of Hawaii and mainland freshmen respondents, but does not cover every survey item. Part II provides the statistical results for each survey item. It also includes the results from five comparative groups: 1) freshmen from Hawaii, 2) freshmen from the mainland, 3) total UH-Mānoa freshmen, 4) public universities – low selectivity (based on SAT scores), and 5) all public universities participating in the survey.
